

North DeSoto Water System

Lead and Copper Rule

La 1031011

December 12, 2018

North DeSoto Water System began operation on March 15, 1974. The North plant was the first pumping station. Collinswood was the second station to come online. Baker Station was the last. It began operation on July 21, 1977.

NDWS started with 186 metered customers in 1974. We now service 2,156 at the time of this writing.

Our water mains are pvc with either brass or pvc connections for services. All mechanical joints and valves are epoxy coated ductile iron. The service lines are ADS PolyFlex pipe.

We have NO lead or copper water mains or service lines. All of our materials meet DHH and AWWA standards.
